

# ERIC FITZGERALD

## Director, Business Support and Development | WOW Tri-Cities

I'm a Nuclear Engineer with more than 30 years of management experience. And though I'm very proud of my engineering career, it is my time as a small business owner that has been the most satisfying and the most challenging. I don't remember a time in my life where I didn't also run a small business. Starting as a small young man with a paper route, growing to owning 5 laundry mats before moving on to a wholesale seafood distribution company with customers in the restaurants, grocery store, and country club sectors until finally finding my niche as a Project Manager and starting Precise Detailz LLC. Precise Detailz LLC is a project management company which currently manages a diverse set of projects including development of a 22,000 SQFT technology center, installation of electric vehicle charging infrastructure and Level 3 DCFC charging stations. I additionally serve in the non-profit sector as Director of Business Support and Development for WOW Tri-Cities, and with great pleasure on the Kadlec Tri-Cities Cancer Center Foundation Board of Directors, and as a mentor to American Corporate Partners mentoring military personnel as they transition to private careers.
