

Empowering the Automotive Industry

The new Road ahead for Connected
and Autonomous Vehicles

Fran Dougherty – CTO
Automotive Industry
Microsoft Corp.

The automotive industry is transforming

By 2030

Autonomous

10-15%

of new cars projected to be fully autonomous

Connectivity

100%

of new cars projected to be connected, up from ~25% today

Electric

~25%

Share of new auto sales

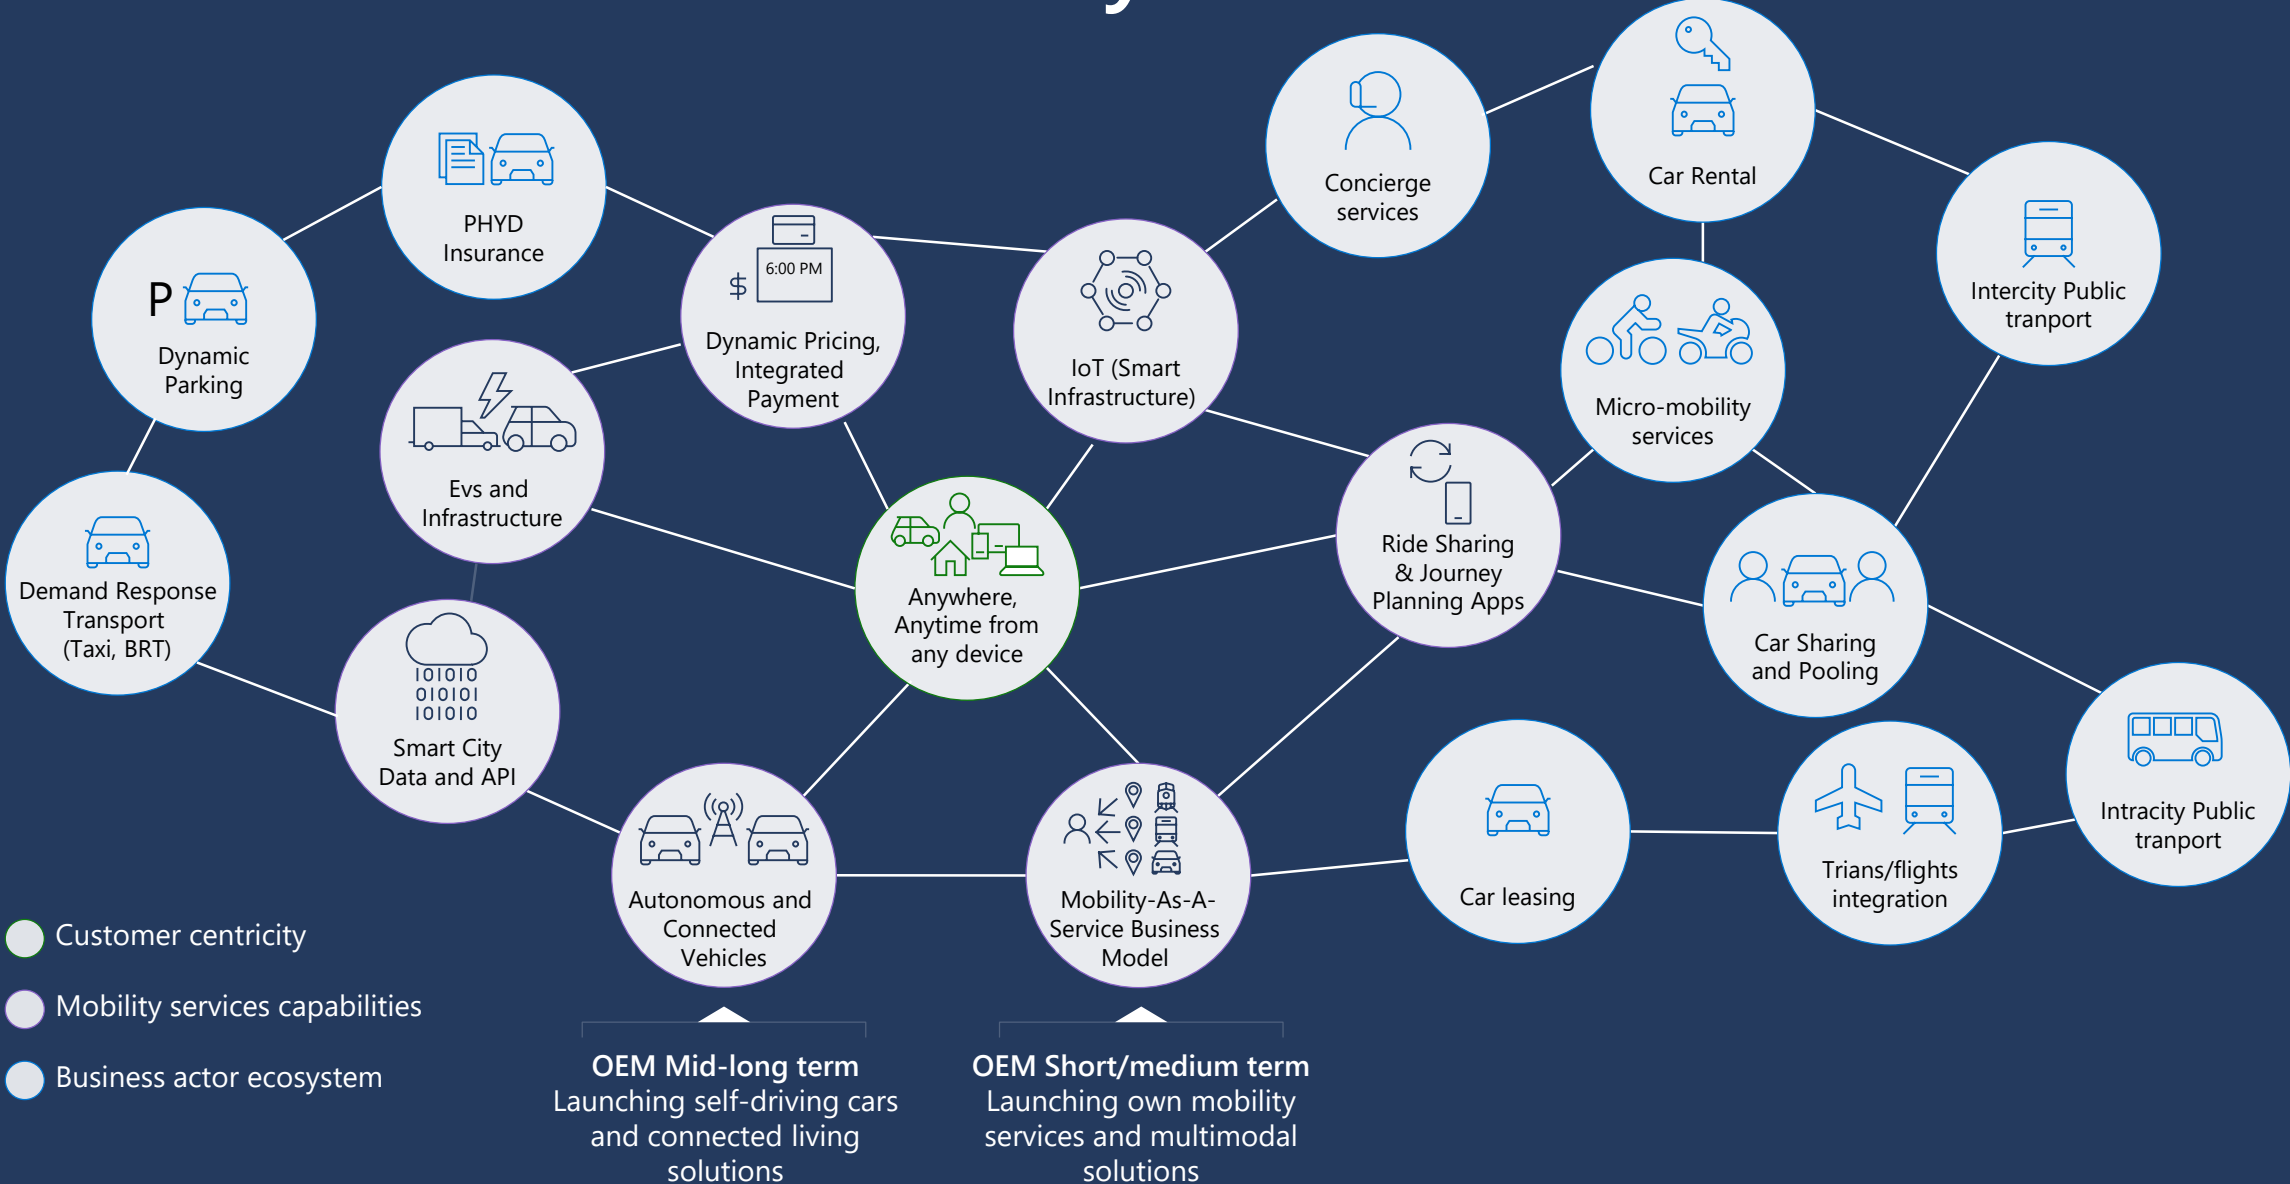

Shared

32%

of miles driven on new cars will be in shared rides

The New Automotive Ecosystem

Technology's Role

Ubiquitous computing

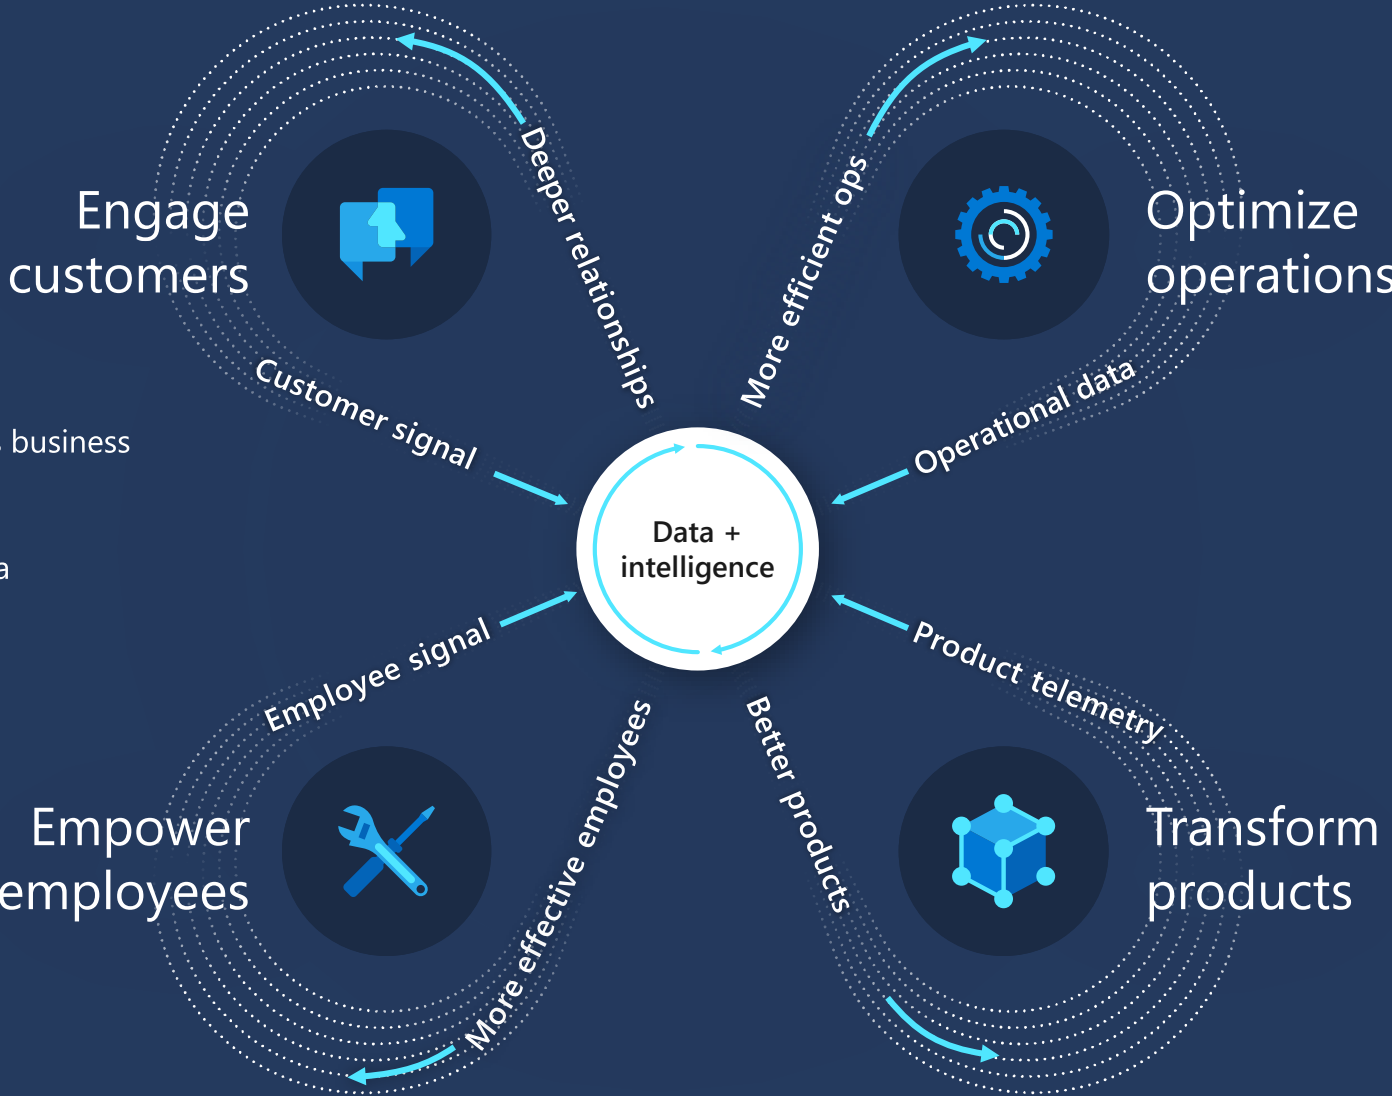

AI

People-centered experiences

DIGITAL FEEDBACK LOOPS

- 1 Data**
Capture digital signal across business
- 2 Intelligence**
Connect and synthesize data
- 3 Action**
Improve business outcomes

Microsoft's Role

Microsoft's Automotive digital transformation principles

Technology partners approach to automotive

1

Complements OEMs and Mobility Service providers – not compete

2

Ensures your data is always under your control

3

Guarantees the brand and customer experience belongs to you

Daimler AG: Digital Transformation through Big Data and AI

DAIMLER

"For a long time it was a dream for us to operate Big Data on the basis of a cloud platform and to make them available to all parts of the company worldwide. Microsoft Azure brings exactly the data protection and data security features that have propelled us into the cloud."

— Guido Vetter, Head of Corporate Center of Excellence Advanced Analytics & Big Data, Daimler AG

Microsoft Connected Vehicle Platform

Combining advanced cloud and edge computing services with a strong partner network to empower automotive companies to build connected driving experiences

VOLKSWAGEN AUTOMOTIVE CLOUD

“Volkswagen, as one of the world’s largest automakers, and Microsoft, with its unique technological expertise, are outstandingly well-matched. Together, we will play a key role in shaping the future of auto-mobility”

— **Dr. Herbert Diess**,
CEO of Volkswagen

Audi AG: Digital Transformation through Big Data and AI

"Thanks to the cloud, the question of storage capacity and computing power has finally been answered. We can fully concentrate on developing and securing our technical solutions for automated and autonomous driving".

— [Adrian James](#),
Head of Automated Driving Safety, AUDI AG

Key Industry Ecosystem Engagements

- Cloud and Analytics partner for ACM, an autonomous and smart mobility test facility
- Leveraged by all OEMs, tier ones and technology start ups
- Engaged with ACM to develop standards

- Open source AD Platform
- 200+ Member Consortium
- Microsoft is the cloud provider for Project Apollo worldwide except for China

- OpenADx
- Interoperable Eclipse Framework

- Collaborate with FEV on L3pilot.eu
- Enable SAE Level 3 functions to be tested in fleets while minimizing the number of errors in order to ready them for series production in the follow-up of the study.
